

COMP2913: Documentation and GitHub grading rubric

Criteria	High Quality (Points)	Medium Quality (Points)	Low Quality (Points)	No evidence	Mark
(a) Records of regular meetings	Detailed records of all meetings are present (4)	Records of most meetings are present, but some details may be missing (2)	Few records of meetings, or records lack important details (1)	0	/4
(b) User and technical documentation	Comprehensive and clear user and technical documentation is provided (4)	Basic user and technical documentation is provided, but lacks some details or clarity (2)	User and technical documentation is lacking or unclear (1)	0	/4
(c) Project board/Kanban chart	A detailed and up-to-date project board or Kanban chart is included (4)	A project board or Kanban chart is included, but lacks some updates or details (2)	project board or Kanban chart lacks crucial information (1)	0	/4
(d) UI designs	Detailed and clear UI designs are included (4)	Basic UI designs are included, but lack some clarity or detail (2)	UI designs are unclear or lacking detail (1)	0	/4
(e) Overall technical design	A detailed and clear overall technical design is included (4)	A basic overall technical design is included, but lacks some clarity or detail (2)	Overall technical design is unclear or lacking detail (1)	0	/4
(f) Testing plan and evidence	A detailed testing plan is included, along with clear evidence of testing (4)	A basic testing plan is included, but evidence of testing is lacking or unclear (2)	Testing plan is lacking detail; insufficient evidence of testing (1)	0	/4
(g) Software Code	Code meets all the requirements, is structured sensibly, uniform, and well-commented; includes	Code meets most requirements, has some structure and uniformity, and includes some comments; may lack some	Code does not meet requirements, lacks structure and uniformity, and is poorly commented;	0	/6

COMP2913: Documentation and GitHub grading rubric

	testing files and clear installation/execution instructions (6)	testing files or clear instructions (4)	lacks testing files and clear instructions (2)		
(h) GitHub Repository	Commit messages are informative, commits are distributed sensibly throughout the sprints, branches have been used effectively, issues have been created and resolved, labels and milestones have been used effectively (6)	Commits, branches, issues, labels and milestones are all used and most aspects are used effectively. Some are present but can be improved (4)	Poor repository management; commit messages, distribution of commits, use of branches, issue resolution, and use of labels and milestones need improvement (2)	0	/6
(i) GitHub Wiki	Records of all meetings, information on design decisions and the design process, designs on data modelling, revised designs of the UI, evidence of systematic testing, clear and detailed user manual documentation, and a final list of product backlog items with their statuses are all present (4)	Some aspects of the wiki are done well, but there are areas for improvement (2)	Poor wiki management; many necessary elements are missing or lack detail (1)	0	/4
				Total	/40
